

**Alaska Energy Cost Reduction Program
Progress Report**

Grantee: Golden Valley Electric Association

Project Name: Parks Highway Electric Line Extensions

Grant # 2195179

Period of Report: April 2004 to June 2004

Project Activities Completed:

75% of the ROW has been cleared and surveying for the plan and profile of the cleared section is underway.

Existing or Potential Problems: There are several native allotments along the route. Our goal is to route the line so that we do not have to acquire easements from these parcels; however, they will be able to receive service in the future if we receive an application.

Activities Targeted for Next Reporting Period:

Continue surveying, line design, ROW clearing, and begin construction in July.
